## Obituary

Hazel Lena Wooden the oldest child of Ralph N. Wooden and wife was born at LeRoy, Kansas, August 1st 1906 and passed away at her home in Blue Bell neighborhood, Monday morning April 20th 1914 age 7 years 8 months 19 days. She leaves to mourn her loss her father, mother, one brother Milton, grandfather Bryan and grandmother Wooden of LeRoy, Kansas three uncles, two aunts, three cousins and a host of friends. She attended school a few weeks and won the admiration of her teacher and schoolmates. She was always ready and willing to help and in sickness she was so willing to do all she could to help. Always so so truthful and frank with her parents and in her last sickness she was so patient and during all her suffering she was very quiet and did not ask for any thing that was unnecessary and all that loving hands could do was done for her but the Master called and she answered his call after two weeks of suffering she passed away with the words "I am well." The heartfelt sympathy of the entire neighborhood goes out to the family in their loss which is her gain. She is now safe in the arms of Jesus. Services were held at the house at 10 a. m. Tuesday by Bro. Jernigan. The following songs were rendered "It is well with My Soul", "We Shall Meet Beyond the River" Safe in The Arms of Jesus", "Theres a Land that is Fairer than Day", "Nearer My God to Thee", and "Beautiful Robes". The pall bearers were Etta and Grace Hammonree, Raymah Callahan and Nellie Bigelow and she was laid to rest in Bixler Cemetery.

The relatives were all present with the exception of her Grandfather and grandmother Wooden and an aunt and Uncle from Le Roy, Kansas.

## CARD OF THANKS

We wish to thank our friends and neighbors for their kindness during the illness and death of our beloved daughter Hazel.

A DAIRY farmer who does not use a cream separator is losing up to \$15 per cow per year. Complete your dairy equipment by the purchase of an International Harvester cream separator--Lily, Bluebell or Dairymaid. These separators skim closely--leaving barely a drop of cream in a gallon of milk--and they will do it for years.

These machines are furnished with pulleys for the use of power. Belted to a small I H C engine, you have the best outfit it is possible for you to buy. Note the low supply can on I H C separators, the height of the milk spout which allows a 10-gallon can to be used for the skim milk, the strong frame with open base which can be kept perfectly clean, and the dozen other features which make these I H C machines the best.

Your local dealer should have one of these machines on sale. If he has not, write us before you buy and we will tell you where you can see one, also send you an interesting book on separators.
